Rubber Wood.

Neoflex™ Wood Series is a 100% EPDM rubber floor covering made of polymerically bound synthetic rubber, which incorporates an advanced polyurethane coating technology. It exhibits excellent physical properties of EPDM rubber floors such as user comfort, flexibility, durability, sound insulation and step noise reduction.

The wood pattern is representative of oak planks and with the selection of 26 background colors and a wide range of oak-pattern colors, a unique floor can be created for a contemporary aesthetic.

Neoflex™ Wood Series is designed to be used in fitness gyms for general club areas, aerobics studio, cardio areas and spinning studios. With the addition of a 7 mm thick shock-pad underlay, making a total of 10 mm, this surface would be ideal for the Body & Mind areas of a fitness gym as well.

Specifications

Property	Standard	Result
Thickness		3 mm
Dimensions		1200 mm x 200 mm
Weight		± 4.65 kg/sqm
Hardness	ISO 7619-1:2010	62.1 ^º Shore A
Determination of Flexibility & Deflection	ISO 24344:2012	No cracking in either direction
Enhanced Slip Resistance	EN 13845:2005 Annex C	Moderate
Dynamic Coefficient of Friction	EN 13893:2022	0.7
Light Fastness	ISO 105-B02:2013	7-8 grade
Residual Indentation	ISO 24343-1:2002	0.18 mm
Dimensional Stability	ISO 239999:2012	0.5%
Flammability	EN 13501-1	Efl (Optional Cfl-s1)
Installation		Double sided tape or full bond
