

Starlux Coir

Starlux Coir is a renewable 100% natural product and is a very absorbent natural fibre, therefore is ideal for drying footwear, providing you a safer entrance way. Starlux is bonded to an impervious PVC backing making Starlux unique and it can be easily cut to shape and size on site, yet does not fray. Starlux can be monogrammed providing you the opportunity to customise your entranceway.

For optimum performance, installation is best in a weather protected area. Starlux If required, a fully compatible matwell system is available complete with mitred corners and fixings. Detailed installation data is supplied with each order and is available on request.

Natural coir mats must be used inside or in weather protected exterior locations. Direct exposure to moisture will cause the mat to expand and swell.

Available in 17mm and 23mm thicknesses – 2000mm roll widths in 10 metre rolls

Starlux has a 12 month wear guarantee against failure due to manufacturing defects.
